EXPERIENCE

Java Developer GoldenPay Baku, Azerbaijan   07/2023 - Current

GoldenPay, a leading payment system company in Azerbaijan, has been at the forefront of the digital payments industry, offering innovative solutions to facilitate secure and efficient transactions. During my work experience there I:

- Integrated with newly joined merchantes and maintained the old merchantes
- Collaborated with cross-functional teams to integrate GoldenPay's payment system with processing centers, enabling seamless transactions and expanding the company's reach.
- Participated in the architectural transformation from monolithic to microservices, enhancing system flexibility and scalability.
- Technologies worked with:
  Java, Spring Boot , Spring Data, Spring, MySQL, SOAP, Swagger, Gradle, Maven, Jenkins, Git, Jira

PERSONAL PROJECTS

- Eduwise online education platform
  - Developed a comprehensive online education platform where users can watch video lessons and take exams in their respective subjects. The platform includes a variety of integrated services to support educational content management and user interaction:
  - Used Technologies: Spring Boot, JPA, MapStruct, Exception Handling, Java Core, Collections, Git
- Div Delivery
  - This project offers delivery solutions. From order placement to real-time tracking, simplify your delivery process. Whether you're a developer or a business, dive into our versatile codebase today."
  - Used Technologies: Java, Spring Boot, JPA, Rest API, Liquibase, Git

EDUCATION

Ingress Academy Advance Backend and Microservice | 01-2024 06-2024
